

Yasin Farmani

Ottawa, ON, Canada +1 (613)-720-1985 Yashin.nhl@gmail.com [linkedin.com/in/yasinfarmani](https://www.linkedin.com/in/yasinfarmani)

Education

M.Sc. Computer Science (Human-Computer Interaction) – Carleton University, Ottawa, ON

B.Sc. Software Engineering – Shomal University

Technical Skills

Languages: JavaScript (TypeScript), Python

Web & Mobile: HTML, CSS, React, Angular, Node.js, Express, Redux, Next.js, Gatsby, GraphQL, Netlify, React Native

Databases: MySQL, PostgreSQL, SQLite, MongoDB

Automation & Testing: Vite, Webpack, Jenkins, Jest

Design & Prototyping: Adobe XD, Figma

Professional Experience

Senior Software Engineer - Upgrade Inc – Ottawa, Canada | 2022 – Present

- Architected and delivered a dealer inventory platform from the ground up, leading a team of 2 engineers to integrate J.D. Power partner listings and expand auto loan cross-selling and customer acquisition.
- Architected and launched the Auto Finance Dealer Review Tool UI, integrating DealerTrack and RouteOne to stream dealer applications, financial data, and collateral details—supporting \$65M/month in loan originations.
- Modernized Netlify CMS architecture by replacing a monolithic single-Markdown structure with modular, reusable widgets—reducing codebase size by 70% and improving code maintainability.
- Built custom ESLint rules to enforce styled-component color palettes, maintaining brand consistency across applications
- Co-led a company-wide rebranding effort, delivering an accessible UI design system (color system, typography) adopted across different company platforms

Software Engineer - Veem – Ottawa, Canada | 2021 – 2022

- Redesigned the onboarding experience into a seamless, multi-step workflow—automating bank account and profile setup to drastically reduce user drop-off, decrease support overhead, and support scaling to 500K+ active users.
- Built and launched the platform's first invoicing system, enabling users to generate and issue invoices directly within payment and money-transfer workflows—scaling feature adoption to 1,000+ invoices generated per month.

Software Engineer - Cisco – Ottawa, Canada | 2018 – 2021

- Engineered Cisco NextGen's **first** reusable UI component library (Angular, NPM, Storybook), streamlining application development and enforcing brand and design consistency across product squads.
- Architected and delivered ThreatNet, a greenfield security app on the NgDevX platform, streamlining vulnerability management and strengthening threat posture across Cisco network environments.
- Engineered UI configuration modules for virtual routers and switches in XPRESSO, integrating with the pyATS framework to streamline multi-device topology setups and automated test suite execution.

Frontend Developer - ESDC – Government of Canada – Gatineau, QC | 2017 – 2018

- Migrated a monolithic PHP Learning Management System to Django MVT, improving code maintainability, enhancing system security standards, and streamlining backend architecture.
- Engineered the database migration from SQLite to MySQL, redesigning models, views, and routing logic to optimize query performance and expand system data capacity.

Frontend Developer - IDEAL Corporation | 2012 – 2016

- Owned the end-to-end lifecycle for 40+ client and corporate websites (e-commerce, corporate, personal)—handling design, ASP.NET/JavaScript development, hosting, deployment, and ongoing maintenance.
